

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	01 October 2026
Team ID	6ab7f31f8c7c66e70672939b
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Project Setup & Requirements	USN-1	As a student, I can use a system built from clearly documented requirements so that EduGenie addresses my real learning needs.	3	High	Mohammed Yasin, Dinesh Kumar
Sprint-1		USN-2	As a student, I can open EduGenie in my browser from a running FastAPI/Uvicorn server so that I can begin without extra setup.	5	High	Jeyapriyan, Mohammed Yasin
Sprint-2	User Interface	USN-3	As a student, I can see a consistent Jinja2 page layout with header, navigation menu and home page so that I can move easily between modules.	5	High	Mathavan
Sprint-2	Backend & API	USN-4	As a student, I can submit input to a module URL and receive a structured response, with a clear message for empty input, so that results display correctly.	5	High	Jeyapriyan
Sprint-3	AI Integration	USN-5	As a student, I can have my request processed by the local LaMini-Flan-T5-783M model so that responses use simple language.	5	High	Gokulnath
Sprint-3	Concept Explanation	USN-6	As a student, I can enter a difficult concept so that I receive a simplified explanation.	5	High	Gokulnath, Jeyapriyan
Sprint-3		USN-7	As a student, I can read the explanation on a dedicated concept page, with a helpful message on failure, so that I can retry or rephrase.	3	Medium	Mathavan
Sprint-4	AI Integration	USN-8	As a student, I can get responses from the Google Gemini API, with secure key handling and clear failure messages, so that my session is not disrupted.	5	High	Gokulnath, Jeyapriyan
Sprint-4	Question Answering	USN-9	As a student, I can submit a study question on a question page so that I receive a clear and relevant answer.	5	High	Jeyapriyan, Mathavan
Sprint-4	Quiz Generation	USN-10	As a student, I can choose a topic and number of questions so that I get a quiz with multiple-choice options and correct answers for revision.	8	High	Gokulnath, Mathavan
Sprint-5	Summarization	USN-11	As a student, I can paste educational text so that I receive a concise summary of it.	5	High	Gokulnath, Mathavan
Sprint-5	Learning Path	USN-12	As a student, I can enter a topic so that I receive a structured, step-by-step learning path to follow.	8	High	Gokulnath, Jeyapriyan, Mathavan
Sprint-6	Integration & Testing	USN-13	As a student, I can switch between all five modules from one navigation menu so that I can use them in a single session.	5	High	Jeyapriyan, Mathavan, Mohammed Yasin
Sprint-6		USN-14	As a student, I can use modules that passed functional testing and bug fixing so that every feature works as expected.	5	High	Dinesh Kumar, Mohammed Yasin
Sprint-7	Documentation & Final Submission	USN-15	As a student, I can rely on a final-tested, documented, demo-ready EduGenie (report, user manual, deployment preparation) so that its capabilities are clearly shown.	8	High	Dinesh Kumar, Mohammed Yasin

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	8	7 Days	01 Oct 2026	07 Oct 2026		
Sprint-2	10	7 Days	08 Oct 2026	14 Oct 2026		
Sprint-3	13	7 Days	15 Oct 2026	21 Oct 2026		
Sprint-4	18	7 Days	22 Oct 2026	28 Oct 2026		
Sprint-5	13	7 Days	29 Oct 2026	04 Nov 2026		
Sprint-6	10	7 Days	05 Nov 2026	11 Nov 2026		
Sprint-7	8	7 Days	12 Nov 2026	18 Nov 2026		
Total	80	49 Days				

Velocity:

Imagine we have a 7-day sprint duration, and the velocity of the team is 11.43 (story points per sprint: 80 story points over 7 sprints). Let's calculate the team's average velocity (AV) per iteration unit (story points per day).

$$AV = \frac{\text{velocity}}{\text{sprint duration}} = \frac{11.43}{7} \approx 1.63$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

Planned (ideal) burndown for EduGenie: 80 story points burned down evenly over 49 days (7 sprints of 7 days).
