

Project Design Phase-II

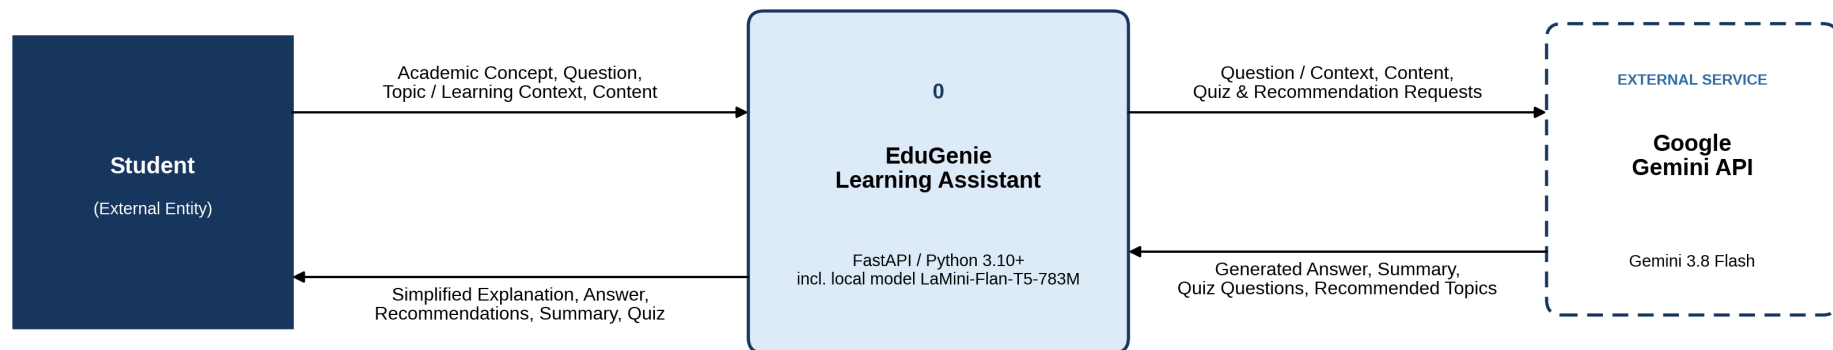

Data Flow Diagram & User Stories

Date	1 October 2026
Team ID	6ab7f31f8c7c66e70672939b
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	4 Marks

Data Flow Diagrams:

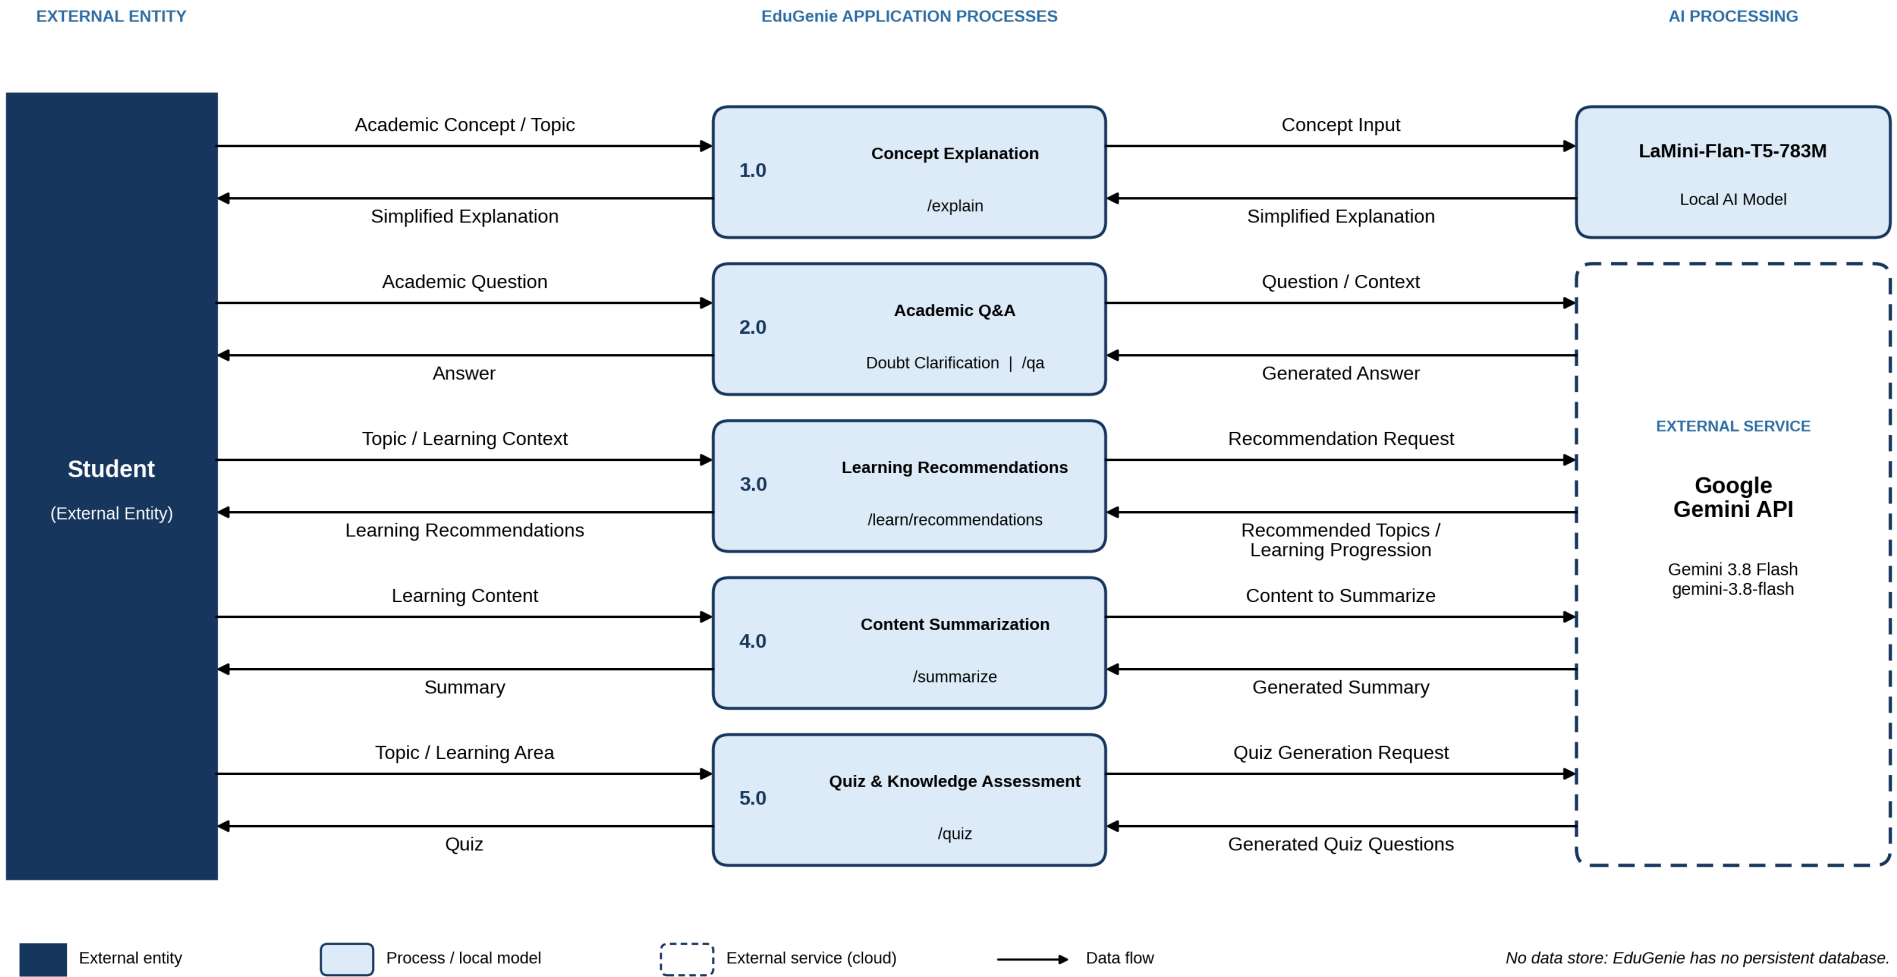

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. It shows how data enters and leaves the system and what changes the information. EduGenie does not use a persistent database, so the DFD contains no data store: data flows only between the student, the application processes and the AI models.

EduGenie: Level 0 DFD (Context Diagram)

Level 0 DFD: no data store is used (EduGenie has no persistent database).

EduGenie: Level 1 DFD

User Stories

Following are the user stories of the proposed solution.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Student	FR-1: Concept Explanation	USN-1	As a student, I want to enter a difficult academic concept, so that I can request a simplified explanation.	I can enter a concept or topic, and the system accepts and processes my request.	High	Release-1
		USN-2	As a student, I want to receive a clear, easy-to-understand explanation of the concept, so that I can understand it at my level.	A simplified explanation is generated and displayed to me.	High	Release-1
	FR-2: Academic Question & Doubt Clarification	USN-3	As a student, I want to ask an academic question, so that I can clarify my doubt.	I can enter a question, and the system accepts and processes it.	High	Release-1
		USN-4	As a student, I want to receive an answer to my question, so that I can resolve my doubt.	An answer is generated and displayed clearly.	High	Release-1
	FR-3: Learning Recommendations	USN-5	As a student, I want to provide a topic or learning context, so that I can find out what to learn next.	I can enter a topic or learning context, and the system processes the request.	Medium	Release-1
		USN-6	As a student, I want to receive relevant topic recommendations in a logical order, so that I can follow a structured learning progression.	Relevant recommended topics are generated and displayed as a learning progression.	Medium	Release-1
	FR-4: Content Summarization	USN-7	As a student, I want to provide lengthy learning content, so that I can get a concise summary.	I can enter the content, and the system accepts and processes it.	High	Release-1
		USN-8	As a student, I want to receive the important points in a short summary, so that I can revise quickly.	A concise summary is generated and displayed clearly.	High	Release-1
	FR-5: Quiz & Knowledge Assessment	USN-9	As a student, I want to provide a topic, so that I can practice it with quiz questions.	I can enter a topic or learning area, and the system processes it.	High	Release-1
		USN-10	As a student, I want to see the generated quiz questions, so that I can check my understanding.	Quiz questions are generated and presented clearly.	High	Release-1
